

AUTOMATED SCREENING KIOSK

ASK

Adding certainty to uncertain times

ASK™ assists industries in maintaining a safe work environment. It's achieved through an automated system consisting of screenings, contact tracing and safety compliance controls. ASK was developed by experts to provide a safety net for your business today, and the flexibility to adapt to the uncertain future. ASK provides safety assurance and certainty, where and when current times may not.

BENEFITS

- **Simplicity** - A minimal learning curve makes our system simple to setup, easy to use, and with little to no effort to maintain.
- **Screening** - Add a custom Covid-19 screening questionnaire or other screening forms your business requires to stay safe and informed in real time.
- **Contact Tracing** - Know with whom and where contacts are visiting. Integrate your businesses data and structure with an easy-to-use interface.
- **Compliance** - Produce unique badges to know who's who, including where, when and what they can access within your business.
- **Administration** - Administrative capabilities allow for powerful searches to easily find information on particular visitors or events quickly.
- **Cloud Power** - Our cloud computing means you will never lose your data in the event of any type of disaster that comes your way. Your data is kept safe and secure at all times with military level encryption.
- **Customizable** - Something here about your logo, company colors or custom questions - tablet and desktop interface for admin management clients and employees on the back end.

// *We are guiding organizations toward better EH&S practice, as well as supporting what operational readiness will mean to each organization, uniquely. By designing functions created for EHS compliance in the modern world, we are flexible enough to adapt to the COVID crisis at hand.*
