Where ESG & EHS&S Come Together...

How it began

A global lighting manufacturer approached LUX interactive with a problem. They needed an application that functioned in a way that was specific to global manufacturing, simple to use, and highly effective at enhancing their Environmental, Health, Safety and Sustainability program in every aspect; from incident reporting to environmental output, and everything else in between.

The Strategy

The uniqueness of this custom-built application led to a ripple effect with multiple globally based organizations attracting to what was built, and how it would enhance their EHS&S programs too. With other organizations utilizing LyfeCycle and contributing to the first-hand perspective and input, lead to a greater understanding of top EHS&S directives straight from the organizations themselves.

The Development Team

LyfeCycle was built on a rich foundation of expert talent at LUX interactive. LUX is a first-in-class Software Company that has been servicing clients in a strategic and custom way for the past two and half decades. From large clientele such as Spirit Airlines and Red Roof Inn to local Associations like the Michigan CPA's and Michigan Realtors; LyfeCycle is founded on a strong and credible reputation in creating superior solutions industry-wide.

Global Management
Ability to collect, analyze, and manage data globally.

Intelligent Analysis
Incidents, Metrics, and Predictive Modeling/Leading Indicators.
